$E = mc^2$

$x = 4+3$ base 6

$X = 16$

$E = mc^2$ is not a proposition.

It's a propositional function.

It is not T or F. — until values are determined.

($E = mc^2$) is a recipe, a rule for computation.

We all have automatic, push-button robot behavior patterns. Some are very intense and many are bland. The bland ones are just as unconscious and robotic as the more intense ones but are generally not even recognized as distinct robot patterns.
Actually the intense ones are the easiest to become conscious of an begin work on.

I hate being addicted to food. I hate it that I feel unworthy. I hate feeling out of control. I hate being a beggar.

I'm afraid that I'm just a fancytalker, talking about what I'm going to do, and never doing it. I'm afraid that I have some essential flaw, that is responsible for my failure, that there's nothing I can do. I'm afraid that I'll never make it, because I feel unworthy. I'm afraid I won't be able to get rid of my feelings of unworthiness. I'm afraid that I will never be in control.

# Letter to Werner

Acknowledge your work in inventing new linguistic configurations/mapping. I know it's difficult. You've made some. Language is the track on which runs the train of thought runs. You've laid a lot of new track.

On side 2 of The Forum Presents: ~~Intern~~ Conversations with Werner Erhard, Vol I / tape 2:
On Problems "thinkingness" linguistic programming

I'd like to offer another map for that territory which people seem to get easily.

~~We don't 'think'~~ think or do we does thinking us.

You say that the point about "who" does the "thinking" is very difficult for most people to get.

Ambiguity about what the word "think" refers to.
I suggest you are referring here to the language function of the brain.
~~"I" "did"~~ I don't 'think'. My lang. machine thinks for me. It's an automatic function.
We need to establish an editorial relationship with our L machine. The problem is we tend to identify "I" with the language machine and believe anything we hear it say.
We need the same 'evaluative' stance we employ when we listen to anyone we suspect is trying to persuade/manipulate us.

---

Why I'm writing — to share some info you might find useful and to let you know I'm here - available for use. Where I'm at. ready for collaboration

members of a linguistic community

It goes on 24 hours a day. We only focus on it a small percentage of the time And then we think "I" does it.

On side 1 - the box you refer is called "English"

2 questions
∞ What am I?
1. Who am I?
2. To what does the word "I" refer?

the word "think" could refer to such diverse processes as painting/sculpting, repairing a carberator, planning a negotiating sessions, etc. I find it useful to define "think" operationally as "talking to oneself". This doesn't denigrate any of the other functions. It just says that it's a useful distinction to make — between talking and other processes. Reprogramming the language/thinking machine is fairly ~~easi~~ a simple process although it does require commitment/practice/etc.

Yours in Earth

Managing Your Vision

Its ok to 'have' a vision, in the future
Its ok to live your vision — go for it.

## Rubbing elbows

Michael Hughes and Walter R. Gove conclude ("Life in a maddening crowd," SN: 6/16/84, p. 377) that crowding does, in fact, create mental health problems. I would suggest that their study (and similar studies) fail to separate the problems of crowding from the problem of confinement.

People can tolerate very crowded conditions if they have a chance for occasional escape. So if a single parent is cooped up all day, every day, the mental strain will be enormous. If another adult is present who can say "I'll watch the kids for awhile while you go out," the strain will be dramatically lessened, even though the crowding has actually increased. The strain will be just as great on a parent in a large house as in a small one, if there is no chance to escape.

The confusion over crowding versus confinement has greatly affected the way we view cities. Low-density housing is not necessarily better than high-density, as studies like this would have us believe. In fact, the opposite may be true, since higher densities can support bus and subway lines that will permit escape for the very high percentage of people in our society who do not have access to a car (the young, the poor, the elderly, the infirm). Sociologists and psychologists would do well to study the effect of confinement on mental health.

An idea whose time has come

Technology (telephone / electronic mail / personal computers / ~~xerox~~ copying machines)

First time in history a global grass-roots political organization is possible

One ~~unconscious~~ assumption that most people of the world operate on is that there isn't enough food/energy/etc to go around and that therefore War and Hunger are inevitable. Throughout all history this was true. It is not true now (documented in ~~xxx~~ by B. Fuller)

The time has come for the people of Earth to take back the power/responsibility they gave away.

What you can do:
* tell people
* open your house
* recruit H. sapiens
* support with money/time/etc.

"This is the true joy in life, the being used for a purpose recognized by yourself as a mighty one; being a force of nature instead of a feverish, selfish little clod of ailments and grievances complaining that the world will not devote itself to making me happy.

I am of the opinion that my life belongs to the whole community and as long as I live it is my privelege to do for it what I can.

I want to be thoroughly used up when I die, for the harder I work, the more I live. I rejoice in life for its own sake. Life is no "brief candle" to me. It is a sort of splendid torch which I have got hold of for the moment, and I want to make it burn as brightly as possible before handing it on to ofuture generations."

TO SPREAD THE GOOD NEWS THAT FOR THE FIRST TIME IN HISTORY WE HAVE THE SCIENTIFIC KNOWLEDGE, THE PHYSICAL RESOURCES AND THE CONSCIOUS INTENT TO END WAR AND POVERTY FOR EVER. ON EARTH.

THE PURPOSE (1985) OF EARTHNET IS TO INFORM THE PEOPLE OF EARTH THAT FOR THE FIRST TIME IN HISTORY WE HAVE THE PHYSICAL RESOURCES, THE SCIENTIFIC KNOWLEDGE AND THE CONSCIOUS INTENTION TO END WAR AND POVERTY FOREVER; AND TO ENROLL INDIVIDUALS IN COMMITTING THEMSELVES TO THAT END.

EARTHNET operates on the assumption that solutions to the problems faced by humanity lay in ~~the~~ communication between and committed action of individuals (human beings) and not the presently instituted national governments.

Earthnet provides the technological means for people to get involved in global political/social/etc. activity and to be in communication with other individual who are doing like wise.

Electro-spiritual reality

Ultimately the universe can't be totally understood. "Understanding" is a 'secondary' phenomenon in Universe. "Understanding" is a subset of Universe's motions. Universe stands under all else.

With Phonetic Writing was born a new being in Universe. A spherical being called Earth.

Phonetic Writing = DNA of Earth

Earth is now bordering on Self-consciousness / self-reflexiveness

This the true joy in life, the being used for a purpose recognized by yourself as a mighty one; being a force of nature instead of a feverish, selfish little clod of ailments and grievances complaining that the world will not devote itself to making you happy. I am of the opinion that my life belongs to the whole community and as long as I live it is my privilege to do for it whatever I can. I want to be thoroughly used up when I die, for the harder I work the more I live. I rejoice in life for its own sake. Life is no "brief candle" to me. It is a sort of spendid torch which I have got hold of for the moment, and I want to make it burn as brightly as possible before passing it on to future generations. (G.B.Shaw) * All men are ordinary men; the extraordinary men are those that realize it. (G.K. Chesterton) * What we call "I" is just a swinging door which moves when we inhale and when we exhale. (Suzuki) * What disturbs peoples minds is not events, but their judgement of events. (Epictetus) * There is no doubt about it, I am definitely confused. (Anon.) * The essence of greatness is the ability to choose personal fulfillment in circumstances where others choose madness. (Anon.) * There is a tide in the affairs of men which, when taken at the flood, leads on to fortune: Omitted, all the voyage of their lives is bound in shallows.... On such a sea are we now afloat, and we must take the current when it serves or lose our ventures. (Shakepeare) * The struggle between men or nations is not between Good and Evil. It is between different ideas of good. (Anon.) * Never attribute to malice what can be adequately explained by stupidity. (Hanlon's Razor) * What great thing would you do if you knew you couldn't fail? (Schuller) * We are left with a crisis in decision. Our main test involves our will to change rather than our ability to change. (Cousins) * The brain is unstable, and we live on the edge of disorganization, whether we allow ourselves to be conscious of it or not. Knowing the limits is wisdom. (Mandell) * Science and religion are not so different in the end, except that in science the ultimate sin is believing too strongly. (Minsky) * A successful analysis is not one that reconstructs the past, but one that creates a useful fiction for the future. (Rifkin) * Doubt is uncomfortable, but certainty is ridiculous. (Voltaire) * Optimist: "This is the best of all possible worlds." Pessimist: " I'm afraid you're right." * For it is known that language does not so much reflect reality as create it. (Watzlawick) * There is no failure. There is only feedback. (Anon.) * It's often easier to fight for one's principles than to live up to them. (Stevenson) * Chance favors the prepared mind. (Pasteur) * After the final "no" there comes a "yes" and on that "yes" the future of the world depends. (Anon.) * Anyone who hasn't seriously questioned his/her sanity is either crazy or not paying attention. (Horn) * If you don't do your own thinking, someone else will do it for you. (deBono) * If you don't do your own thinking, someone else will have to do it for you. (Horn) * Truth hath better deeds than words to grace it. (Shakespeare) * If you think in English you're confused! (Horn) * This statement is not self-referential. (Anon.) * Evolution not only continues, it accelerates! (Anon.) * You don't have to be a genius to think like one. (Horn) * I believe that happiness is the by-product of the search for meaning, and that emptiness is the by-product of the search for happiness. (Weyand) * Alas, after a certain age, every person is responsible for his face. (Camus) * READY. FIRE. AIM. (Anon.) * If something is worth doing, it's worth doing half-assed. (Ferguson) * 10,11,12,13,14,15,16,17,20,22,24,31,____, 121,10000,11111111111111111.(Anon) * "No"s are just part of the process of getting what I want. (Anon.) * If, on the other hand, men do not trust their nature or the universe of which it is a part, how can they trust their mistrust? (Watts) * When the need arises - and it does - you must be able to shoot your dog. Don't farm it out. That doesn't make it nicer. It makes it worse. (Heinlein) * When the only tool you have is a hammer, every problem looks like a nail. (Anon.) * My commitment is to truth, not consistency. (Gandhi)

"Getting off it" isn't always easy. Maybe we could talk about creating/discovering a 'position' from which you can get off it.

Maybe you can't get there (directly) from here. Maybe you can get there (indectly) by going somewhere else first.... then going to target level.

One reason why people get angry when they're not waited on quickly or feel they're being ignored is that it reminded us of our belief that we don't make a difference.

Making a difference is not in the Domain of Evidence.

Confusion of Domains primarily responsible for X

We seek evidence for "things"

Rules apply to 'ways of looking' at "the thing itself"; not the thing itself

#1 Acknowledge that 'something' is missing in your life!
that doesn't mean you're wrong, stupid, a failure, etc. It means you vision outreaches present reality. It means you're a conscious, caring human being.

#2 Acknowledge your 'highest' vision of how it could be. that it's not impossible to be realized

#3. Acknowledge that you don't have all the answers to everything. Be open to the ~~reality~~ possibility that some of your strongly held opinions could be dis-empowering, inappropriate, irrelevant, even wrong.

#4. Acknowledge a Power in Universe larger than you. in which you are embedded. Align your life with that Power.

- debugging English E'
- A language designed for precise thinking and accurate communication
- English - a wild language
- Mark Twain - "It's not what you don't know that hurts ya. It's what ya do know that ain't so."
- I have info. with me. see me later I'll stay around later to answer questions
- "Language doesn't so much reflect reality as create it." Paul Watzlawick
- We can't afford so many unconscious assumptions anymore. we are too powerful to remain in ignorance. A hundred years ago our ignorance didn't threaten life on Earth. Now it does

Science has given us too much power to remain unconscious

Talk with susan about non-judgement & disidentification from judgement

I want to feel enthusiastic about selling my stuff. I want specific products I want to see God in everything all the time. I want to want to more of like people and not be so self-centered. I want to be happy. I want people to feel good around me. I want to feel worthy of the good stuff in life. I want to love my body and have sexual relating in my life. I want to be known acknowledged by me and others for making a difference on life. I want to see a transformed Earth. I want to get rich (million/year) participating in the Metamorphosis of Earth. I want to be acknowledged in Books/myth/ele as giving us E

222-

My feeling is that I always have to hold my stomach in because I'm so fat. Women won't find me sexually attractive. I'll be lonely. It's difficult / tension-producing to always hold my stomach in. My intention is to have a body that I really like (that weighs 160 lbs.) It's difficult to be present for life when my attention is focused on my body and what judgements I assume others will make on me.

---

I don't know where I am with respect to my "area". I don't even know what my "area" is. Is "self love" the way to described it. Perhaps it's the minimizing of judgement — no it's the dis-identification from my L.M.'s judgement I need to get that I is perfect, compleat and whole.

---

How have I grown as a result of my perceived inadequacies? I is am my obstacles. These obstacles are my life. I can't even begin

Don't take notes.
